

# KPI 360™

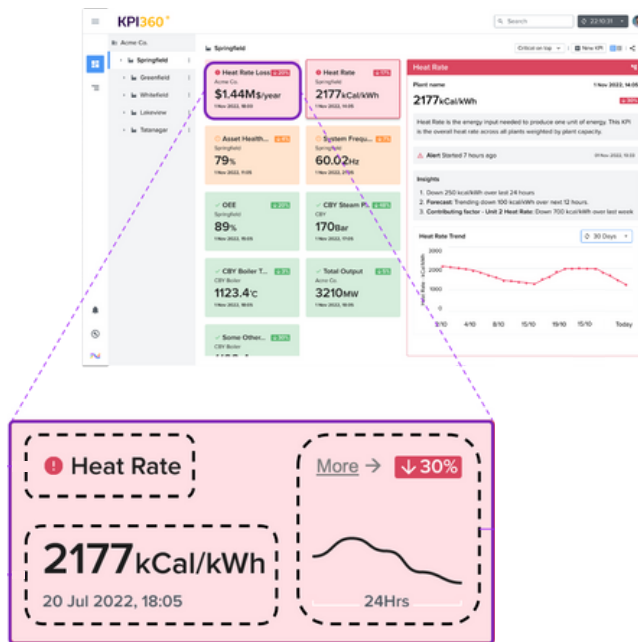

## Actionable operating insight from shop-floor to top-floor

### Industrial Platform for Advanced Predictive & Prescriptive AI

KPI 360 is a solution that helps companies get a single view of all operations using real-time data from a multitude of sources. Users can quickly monitor their KPIs in real-time through alerts, notifications, flexible visualizations, and a range of analytics out of the box. With no need for large projects to aggregate data, define KPIs, build visualizations, or configure dashboards, it sets up in minutes.

### Top Features

- **Real-time KPI monitoring**
  - Pre-built KPIs
  - Powered by Thermodynamics Engine
  - Condition-based Alerts & Notifications
- **KPI Value Generation Trees**
  - Unit level KPIs to business outcome
  - Contributing factors
  - Drill-down to root-cause
- **Retrospective & Predictive KPIs**
  - KPI behavior insights with contributing factors
  - AI forecasts with driving factors
  - Days until breach / failure
- **Intuitive Collaboration**
  - Build your own analysis on a canvas & share with others
  - No-code data analysis (aggregation, filters, clustering, visualizations)
  - One-click Report Generation

# KPI 360™

## Actionable operating insight from shop-floor to top-floor
