

Symphony AzimaAI's APM 360™ & Performance 360™ Take Honors

Woburn, MA – August 3rd, 2020 – Symphony AzimaAI announced today its APM 360™ & Performance 360™ products have been selected finalist for Products of the Year by Oil & Gas Engineering.

APM 360 was selected in the Data & Analytics Category - APM 360™ provides overall asset health, real-time prescriptive monitoring, and predictive maintenance - accurately recommending specific actions. APM 360 leverages IIOT, AI & FMEA to account for complex, dynamic machinery patterns to ensure critical machinery operates at peak performance.

Performance 360 was selected for the IIOT & Process Control Category - Performance 360™ delivers process performance & health management solution for the process industries. Performance 360 uses IIOT & artificial intelligence to predict how a process will perform in the future, and identify potential process disruptions, quality issues, and trip conditions - with enough time to not only to proactively act to avoid trips, lost batches and decreased quality. It also delivers near real time insight to adjust operations for optimized plant performance to improve yield.

“This recognition speaks volumes for our team’s deep process industry domain expertise, said Dominic Gallelo, CEO of Symphony AzimaAI. “We are at the vanguard in harnessing 3rd Generation AI in combination with process and mechanical engineering know-how, to deliver important value to our users.”

Winners for the Oil & Gas Engineering Product of the Year will be announced December 7, 2020.

About Symphony AzimaAI

For 50+ years, SAAI have been innovators of industrial insight - from machine component health to plant performance optimization. This has been enabled by a talented and rapidly growing team of deep domain experts in process industries, discrete manufacturing, IIoT, and artificial intelligence. SAAI is a company of innovation and firsts including:

- The largest rules base and fault condition library for machine health
- High accuracy data capture devices
- The industry’s first complete cloud enabled PdM program solution
- The industry’s largest data lake of machine health data
- The use of 3rd Generation AI to bring even higher fidelity into asset performance management and plant operations optimization.
