Symphony AzimaAI Announces Three Transformative Industrial Leaders

Recipients of 2020 Annual User Achievement Awards are Emblematic of the Future of IIoT, Reliability, and Enterprise AI Technology

Woburn, MA – February 1, 2021 – Symphony AzimaAI announced today its annual awards for outstanding user achievement in industrial reliability and enterprise AI. This year's awardees illustrate the characteristics of a select group of individuals across diverse industries that are developing a new category-defining approach to enterprise AI in industrial applications. The awards recognize the 55-year history of Symphony AzimaAI users and their innovative programs for reliability.

The 2020 award winners are:

- Tim Hunt of Logan Aluminum – The Engagement Award for outstanding collaboration in advancing reliability technology
- Fred Gabuya of Air Liquide – The Impact Award for driving outstanding results in a reliability program
- Scot Larson of Cargill – The Start-up Award for delivering rapid start-up results in a reliability program

"The strength of a company is anchored by the engagement and innovation of its customers. Individuals like Tim, Fred, and Scot are building the organizational and industry-wide transformation that will ultimately bring great benefits," said Symphony AzimaAI Chief Executive Officer Dominic Gallello. "Tim, Fred, and Scot are not only pillars for their own companies, but they also provide guidance and inspiration in driving the advancement of Symphony AzimaAI's technologies and services. We are extremely appreciative to have their partnership."

Symphony AzimaAI customers have a track record of achieving best-in-class industrial process and asset optimization supported by experienced domain experts using advanced technology. The world's most sophisticated industrial enterprises are Symphony AzimaAI customers, and many of the world's leading industrial optimization experts are Symphony AzimaAI team members. As the industrial internet goes mainstream and enterprise AI achieves step-change advances in specialties such as low-cost, high-performance sensors, and cloud-hosting, Symphony AzimaAI is partnering with a growing ecosystem of forward-thinking partners and customers to continue the company's commitment to best-of-breed thinking and technology.

About Symphony AzimaAI

For more than 50 years, Symphony AzimaAI has been the leading innovator of industrial insight, from machine component health to plant performance optimization. This innovation is enabled

by a talented and rapidly growing team of deep domain experts in process industries, discrete manufacturing, IIoT, and artificial intelligence. Symphony AzimaAI innovation and firsts include:

- The most extensive rules base and fault condition library for machine health
- High accuracy data capture devices
- The industry's first complete cloud-enabled PdM program solution
- The industry's largest data lake of machine health data
- The use of third-generation AI to bring even higher fidelity into asset performance management and plant operations optimization

Symphony AzimaAI solutions span predictive maintenance, process health, and optimization, including data acquisition devices and software.

About SymphonyAI

SymphonyAI is building the leading enterprise AI company for the digital transformation of the business enterprise, across the most important and resilient growth verticals, including life sciences, healthcare, retail, consumer packaged goods, financial services, manufacturing, and media. In each of these verticals, SAI businesses have many of the leading enterprises as clients. SAI is backed by a $1 billion commitment from Dr. Romesh Wadhwani, a successful entrepreneur and philanthropist. Since its founding in 2017, SymphonyAI has grown rapidly to a combined revenue run rate of more than $300 million and over 2,200 talented leaders, data scientists, and other professionals.
