

Symphony IndustrialAI's Watchman AIR™ Is Chosen As Finalist For Oil & Gas Engineering 2021 Product Of The Year

Finalist status further highlights the massive shift from human to online in plant operations

Woburn, MA – September 13, 2021 – Symphony IndustrialAI announced today that the Watchman AIR™ wireless vibration monitoring solution has been chosen as a finalist for the 2021 product of the year by Oil & Gas Engineering.

“Industry is at an inflection point in its adoption of wireless machine condition monitoring, driven by Watchman AIR’s breakthrough price/performance,” said Symphony Industrial AI Chief Executive Officer Dominic Gallelo. The benefits of machine health prediction and prescription daily, the elimination of expensive and short supply collection labor and safety for hard to reach and dangerous places make Watchman AIR an extraordinarily compelling value for our users.

Watchman Air includes the Accel 310™ high-resolution wireless vibration system, allowing teams to monitor machines 24 hours a day, seven days a week, with hourly summaries and daily diagnostic analysis to detect early faults and predict failures months in advance. Watchman AIR provides automated diagnostics backed by the reliable expert automated diagnostic system (EADS) and uses meshed networks to reliably gather data across long ranges.

By combining AI with the world's largest machine condition database, Watchman Air gives users the ability to easily establish accurate baselines and component definitions. Businesses gain a complete understanding of emerging faults and prioritized repair action recommendations alongside asset, plant, and corporate health scores delivered through the PredictivePortal™. Watchman Air provides a dramatic increase in plant uptime, reduced maintenance costs, and improved safety.

About Symphony IndustrialAI

Symphony IndustrialAI is an innovator in industrial insight, accelerating autonomous plant operations. The industry-leading EurekaAI/IoT platform and industrial optimization solutions connect tens of thousands of assets and workflows in manufacturing plants globally and process billions of data points daily, pushing new plateaus in operational intelligence. Symphony IndustrialAI digital manufacturing solutions connect devices, processes, people, and systems enabling harmonizing plant automation and control. Symphony IndustrialAI plant performance applications span asset predictive maintenance and process health and optimization, maintaining high availability of equipment, extending the life of capital assets, and reducing process variability. Symphony IndustrialAI solutions provide high value to its users by driving variability out of processes and optimizing operations for throughput, yield, energy efficiency, and sustainability.

About SymphonyAI

SymphonyAI is building the leading enterprise AI company for digital transformation across the most important and resilient growth verticals, including life sciences, healthcare, retail, consumer packaged goods, financial services, manufacturing, and media. In each of these verticals, SAI businesses have many of the leading enterprises as clients. SAI is backed by a \$1 billion commitment from Dr. Romesh Wadhvani, a successful entrepreneur and philanthropist. Since its founding in 2017, SymphonyAI has grown rapidly to a combined revenue run rate of more than \$300 million and over 2,200 talented leaders, data scientists, and other professionals.
