

Symphony IndustrialAI CEO Speaks on Industrial AI and Machine Reasoning at Manufacturing Industry Events

Dominic Gallelo will share strategies for sustainable plants, rapid adoption of AI for multivariate analysis, and digitally connected frontline workers

Woburn, MA – January 20, 2022 – Symphony IndustrialAI announced today that CEO Dominic Gallelo will speak at multiple conferences throughout 2022. He will discuss the real-world impact artificial intelligence (AI) is having on industrial operations today and in the future.

Three trends Mr. Gallelo will address include:

- The “code red” urgency to make plants more sustainable by improving energy efficiency and lowering emissions such as CO₂, NO_x, and SO_x
- The rapid adoption of AI driven multi-variate analysis in the process and discrete manufacturing industries for asset health and process optimization
- Why every enterprise needs digitally connected frontline workers

Gallelo will present real-world use cases and strategies where technology that directly addresses these trends contributes to making assets more reliable and manufacturing processes more efficient and sustainable. Mr. Gallelo will deliver keynotes at the following conferences:

- Plant Reliability Excellence Conference 2022, February 21-24, 2022, Dubai, United Arab Emirates
- Smart Manufacturing Summit, March 2-4, 2022, Bologna, Italy
- World Annual Smart Manufacturing Excellence Summit, March 16-18, 2022, Munich, Germany
- 2022 2nd International Conference on Digital Manufacturing, April 22-24, 2022, Ho Chi Minh City, Vietnam
- Smart Process Manufacturing Kongress, May 3-4, 2022, Germany
- POWERGEN International 2022, May 23-25, 2022, Dallas, Texas
- Connected Plant, May 23-26, 2022, Atlanta, Georgia
- 2022 ARC Industry Forum, June 6-9, 2022, Orlando, Florida
- Downstream USA, June 8-9, 2022, Houston, Texas
- IX Event, October 18-19, 2022, Boston, Massachusetts

About Symphony IndustrialAI

Symphony IndustrialAI is an innovator in industrial insight, accelerating autonomous plant operations. The industry-leading EurekaAI/IoT platform and industrial optimization solutions

connect tens of thousands of assets and workflows in manufacturing plants globally and process billions of data points daily, pushing new plateaus in operational intelligence. Symphony IndustrialAI digital manufacturing solutions connect devices, processes, people, and systems enabling harmonizing plant automation and control. Symphony IndustrialAI plant performance applications span asset predictive maintenance and process health and optimization, maintaining high availability of equipment, extending the life of capital assets, and reducing process variability. Symphony IndustrialAI solutions provide high value to its users by driving variability out of processes and optimizing operations for throughput, yield, energy efficiency, and sustainability.

About SymphonyAI

SymphonyAI is building the leading enterprise AI company for digital transformation across the most critical and resilient growth verticals, including life sciences, healthcare, retail, consumer packaged goods, financial services, manufacturing, and media. In each of these verticals, SAI businesses have many leading enterprises as clients. SAI is backed by a \$1 billion commitment from Dr. Romesh Wadhvani, a successful entrepreneur and philanthropist. Since its founding in 2017, SymphonyAI has grown rapidly to a combined revenue run rate of more than \$300 million and over 2,200 talented leaders, data scientists, and other professionals.
